

Accelerating development in EYFS through high quality practice and provision

Facilitator: Charlotte Hindley, Associate, Karen Ardley Associates

This one day programme has been designed to provide a practical and interactive opportunity to explore high quality practice in EYFS. Children's development in the EYFS areas of learning can be accelerated through the provision of creative and challenging opportunities for collaborative activities and structured play. How is your setting promoting the development of each child? How can you ensure the maximum development for children through the provision of a high-quality enabling environment?

Aimed at all EYFS practitioners, this programme will provide lots of practical ideas for you to apply in your setting to maximise the development of every child.
